To the least to a 11/70META) in an illument least to 0.00	/ 440 ml IVDD	Interval	Defer Until	Duration
□ zoledronic acid (ZOMETA) in sodium chloride 0.9% 110 mL IVPB Once 1 treatment Intravenous, Continuous, Starting H Pharmacy's Suggested Dose Instructions: Check SCr monthly. Instructions: Prior to administration, the estimated GFR must be greater than 30, calcium in normal range and Vitamin D value over 30. Administer as a single intravenous solution through a separate vented infusion line, do not allow to come in contact with any calcium or divalent cation-containing solution. Infusion time must be over 20 minutes. On the day of treatments patient should drink at least 2 glasses of water within a few hours prior to infusion. All patients should be instructed on the importance of calcium and vitamin D supplementation in maintaining serum calcium levels. THIS IS A HAZARDOUS AGENT. Must use appropriate precautions when handling and disposing of this agent. Multiple Myeloma patients may have Zometa infused over 30-45 minutes.
