Hospital Mask Policy Update

In order to conserve masks for patients with respiratory symptoms and health care workers caring for patients with COVID-19, we are not giving masks to patients who do not have symptoms; visitors or delivery people.

You will be safe walking through the hospital without a surgical mask as we have excellent air quality. Any health care workers you encounter will be masked per our universal mask use policy, which helps to prevent the spread of infection.

Please clean your hands often at the hand sanitizer stations located throughout the hospital.

Thank you for understanding.
